I. FOREWARD

A. GENERAL STATEMENT - MEDICAL CARE REIMBURSEMENT GUIDELINES

The Utah Labor Commission is to set the fees, if any, and rules for medical providers as defined and authorized in §34-2-407, Utah Code Annotated. The Utah Labor Commission adopted its first Relative Value Fee Schedule (RVS) in 1956 and has updated and maintained a Medical Fee Schedule until this present time through the efforts of many individuals serving on the Commission's Medical Fee Advisory Committee. Current members of the medical fee committee are:

Labor Commission

Joyce Sewell, Director, Industrial Accidents
Alan Colledge, MD, Medical Director, Chair

Orthopedic Physician Representative

J. Eric Vanderhooft, MD

Primary Care Physician Representative

Mark Anderson, MD

Occupational Physician

Edward Holmes, MD

Chiropractic Physician Representative

Ted Conger, DC

Physical Therapy Representative

Eric Passey, RPT

Workers' Compensation Representatives

Dean Sanders
Workers Compensation Fund
Peg Howarth
Workers Compensation Fund

Private Worker's Compensation Writers

David Libby, Workers' Compensation Claims
Liberty Mutual Insurance

Self Insured Nurses Practitioner – Physician's Assistant

Kim Moulton, CNP

Coding Expert Resource

Mari Ann Randall

INGENIX

Melissa Fonesbeck

INGENIX

The Labor Commission, with the approval of the Workers' Compensation Advisory Council, has adopted this 2007 Medical Fee Schedule. This schedule is based on the 2007 CMS Resource Based Relative Value Scale (RBRVS) and the AMA 2007 CPT.

The adoption of this schedule allows recognition of the latest technology in the exchanging of information electronically through one fee schedule for all types of billings by medical providers, i.e., Medicare, health insurance, or workers' compensation from computer systems with one procedure listing.

As defined below, the Commission has adopted its own unique conversion factors for each specialty.

B. RBRVS – DEFINITION OF USE

The Centers for Medicare and Medicaid Services (CMS) Transitional Relative Value as published bi-annually in the Essential RBRVS by INGENIX has been selected as the method for calculating reimbursement using the 2007 AMA CPT-4 coded procedures for those providing care for injured workers covered under the Utah Workers' Compensation Act. A copy of the current AMA CPT may be obtained by calling 1-800-621-8335. A copy of the Resource Based Relative Value Scale (RBRVS) can be obtained by calling INGENIX at 1-800-999-4600.

- This RBRVS system uses the three variables listed below to derive a single number, referred to as the Relative Value Unit (RVU), which has been assigned to each CPT-4 code.
- The total RVU is comprised of three distinct values:
 - Work Expense Value (WE)
 - Practice Expense Value (PE)
 - Malpractice Expense Value (MAP)To determine the total amount for reimbursement, the RVU assigned to each CPT code is to be multiplied by each specialty's unique 2007 Utah Labor Commission's conversion factor to obtain the total reimbursement value.
[Example: (2007 CPT's RVU) x (2007 Utah Labor Commission's designated conversion factor as per specialty expressed in dollars) = the Total Reimbursement Value.]
- The Utah Labor Commission has chosen NOT to use CMS's designated Utah's Geographic Practice Cost Indexes, (GPCI) adjustment, but to use the non-adjusted national RBRVS to calculate reimbursement values. This will **simplify** calculating current reimbursement rates by providers and payors, and also, facilitate the Labor Commission's yearly updates and comparative studies.

ASSIGNED CONVERSION FACTOR DOLLAR AMOUNT

- **July 1, 2007, the Utah Labor Commission’s conversion factor to be used with the RBRVS procedural unit value as per specialty will be:**

Medicine, E&M	\$44
Evaluation and Management Codes 99201-99204 and 99211-99214	\$45
Restorative Services	\$44
With codes 97003 at 1.5 RVU and Code 97002 & 97004 at 1.0 RVU	
Surgery	\$37
All codes in the 20000 and 60000 sections and	
codes 49505 through 49525	\$58
Radiology	\$53
Anesthesiology*	\$41
Pathology and Laboratory **	

- * **Anesthesia:** Medicare’s Base Units and methodology for time calculation (**1 unit for 15 minutes of anesthesia**) is adopted with the conversion factor listed above.

- ** **Pathology and Laboratory:** The current RBRVS identifies values for specific codes that require Pathologist services. All other reimbursement rates for laboratory and pathology codes will be 150% of the Utah Medicare Laboratory Fee Schedule. A copy is available through the Medicare carrier (Blue Cross/Blue Shield of Utah).

+ **Setting for Procedure:** The physician must identify the setting where the procedure was performed when billing.

Provided in an office or clinic setting: These procedures are reimbursed using the Non-Facility Total RVU, with the exception of injections of a type of which cannot be self-administered, and if they are directly related to the treatment of an injury or direct exposure or condition. Splints, redressing materials and casting supplies are payable separately under the Labor Commission’s supply provision rule – R612-2-16. In addition, unusual services and medications may be billed separately if Identified with a -25 modifier and supported by documentation.

Provided in a facility setting: These procedures for physician services are reimbursed using the Facility Total RVU for the calculation of payment as the facility will be billing for the direct and indirect costs related to the service.

+ **Non Assigned CPT Codes:** For those few codes not listed in Medicare’s RBRVS Fee Schedule or INGENIX/Publishing/Medicode, contact the Labor Commission to see if a reimbursement value has been assigned.

C. MAXIMUM ALLOWABLE FEE

1. **The RBRVS Fee Schedule is the maximum fee for a procedure used with the Utah Labor Commission’s conversion factors for each specialty. The**

RBRVS, through an intense study of input, is based on the resources needed to accomplish a particular procedure, and thus, an unusual method in itself does not warrant an increased fee. A physician should not charge more than his/her usual fee. Items that are a portion of an overall procedure are not to be itemized or billed separately.

2. **If an employer or carrier has a contract with a provider for discounted service given to an injured worker, the discount applies.** If there is no contract, then the RBRVS fee schedule applies.
3. **Rounding to the Nearest Dollar:** Carriers may calculate fees ending in odd cents by rounding to the nearest dollar; round down for \$.49 or less and round up for \$.50. If this is done on some charges, it must be done with all charges. If the medical provider has rounded all individual fees, the total of these fees should be paid as submitted, by recognizing that in any given series of bills, this may represent a trivial under payment or overpayment that will average out with time.
4. **Consultation:** Initial evaluation and subsequent services are designated as listed in Levels of Service. Visits and consultations should be placed in the proper category for the level of service. A referral may ensue after completion of a consultation, but such an event does not preclude the fact that the initial evaluation was, indeed, a consultation. Only advice and/or an opinion should be rendered for consultation services. Care and treatment of the patient should not be undertaken without a clear and mutual understanding between the treating physician and the consulting physician.
Referral: A referral is the transfer of the total or specific care of a patient from one physician to another and does not constitute a consultation.
5. **Emergency Room Consultation:** When a physician is called to the emergency room to see and assume the care of a patient in his specialty, he can make a charge for a consultation prior to surgery using a -57 modifier. (New) In the case of a non-surgical admission, one cannot charge for a consultation in the emergency room and, also, for a work-up for the hospital admission.
6. **Professional – Technical Billing:** Each service rendered will be reimbursed one time. If the service has a professional and technical component, billed by separate entities, each will be reimbursed by their respective component. A second interpretation may be covered when pre-authorized with the payor.
7. **After Hour Coverage:** Utah’s Guidelines are consistent with the RBRVS using the standard Medicare guides. Codes 99050 through 99058 are used to identify emergency and after hour care.
8. **Clarification of R612-2-18 for Reimbursement for Dental Injuries:**
 - A. This rule establishes procedures to obtain dental care for work-related dental injuries and sets fees for such dental care.
 - B. Initial Treatment.
 1. If an employer maintains a medical staff or designates a company doctor, an injured worker seeking dental treatment for work-related injuries shall report to such medical staff or doctor and follow their instructions.
 2. **If an employer does not maintain a medical staff or designate a company doctor, or if such staff or doctor are not available,** an injured worker may consult a dentist to obtain immediate

dental care for injuries caused by a work-related accident. The insurer shall pay the dentist providing this initial treatment at 70% of UCR for the services rendered.

C. Subsequent care by initial treatment providers.

1. If additional treatment is necessary, the dentist who provided initial treatment may submit to the insurer a request for authorization to continue treatment. The transmission date of the request must be verifiable. The request itself must include a description of the injury, the additional treatment required, and the costs of the additional treatment. If the dentist proceeds with treatment without authorization, the dentist must accept 70% of UCR as payment in full and may not charge any additional sum to the injured worker.
2. The insurer shall respond to the request for authorization within ten working days of the request's transmission. This ten day period can be extended only with written approval of the Industrial Accidents Division. If the insurer does not respond to the dentist's request for authorization within ten working days, the insurer shall pay the cost of treatment as contained in the request for authorization.
3. If the insurer approves the proposed treatment, the insurer shall send written authorization to the dentist and injured worker. This authorization shall include the anticipated payment amount.
4. On receipt of the insurer's written authorization, and if the dentist accepts the payment provision therein, the dentist may proceed to provide the approved services. The dentist must accept the amount to be paid by the insurer as full payment for those services and may not bill the injured worker for any additional amount.

D. Subsequent care by other providers.

1. If the dentist who provided initial treatment does not agree to the payment offered by the insurer, the insurer shall within 20 calendar days direct the injured worker to a dentist located within a reasonable travel distance who will accept the insurer's payment offer.
2. If the insurer cannot locate another dentist to provide the necessary services, the insurer shall attempt to negotiate a satisfactory reimbursement with the dentist who provided initial treatment.
3. If the insurer is successful in arranging treatment with another dentist, the insurer shall notify the injured worker.
4. If, after having received notice that the insurer has arranged the services of another dentist, the injured worker shall only be responsible for payment at 70% of UCR. Under the circumstances of this subsection (4), the treating dentist may bill the injured worker for the difference between the dentist's charges and the amount paid by the insurer.

- E. Payment or treatment disputes that cannot be resolved by the parties may be submitted to the Labor Commission's Adjudication Division for decision, pursuant to the Adjudication Division's established forms and procedures.

II. GENERAL GUIDELINES

A. MEDICAL CARE GUIDELINES

- * **An injured employee is entitled, without personal expense, to medical care, treatment, and hospitalization reasonably necessary, up to the limits prescribed by the law.** The physician should always bear in mind that the payor must make his/her decision based on the information provided by the physician. If the physician has not sufficiently documented the treatment given and the reasons for that treatment, the payor may consider treatment unreasonable or unnecessary.
- * **It is the prerogative of the attending physician to determine the type, duration and frequency of treatment, including hospitalization and nursing services.** Such services must be provided in accordance with recognized professional standards for the type of injuries incurred. Services in addition to those prescribed or ordered by the attending physician, must be paid for by the patient.
- * **Billing for a new patient:** A physician may bill the new patient E&M code when seeing an established patient if there is a new injury.
- * **Discharge from the hospital, or transfer to a facility of a lesser nature, should be done at the earliest time appropriate to good medical practice.** Extended-care facilities should be utilized when necessary. In certain cases, arrangements should be made with the carrier for home care. Payment for hospital care is limited to the bed rate for a semi-private room. If the patient requests a more private hospital accommodation without medical documentation of need, the patient will be responsible for the difference personally. The physician should also use special hospital units, such as intensive care, only to the extent necessary. Special nursing care is rarely required, due to the intensive or critical care units in hospitals, but can be utilized if necessary.

1. Excessive Charges

A charge is excessive if any of the following conditions apply to the charge:

- a. The charge exceeds the amount for the type of service allowed in the medical fee schedule of this chapter, or
- b. If not specified in the RBRVS fee schedule, the charge exceeds that which prevails in the same geographic community for similar services or treatment, or
- c. The charge wholly or partially duplicates another charge for the same service, such that the charge has been paid or will be paid in response to another billing.

2. **Excessive, Unnecessary or Questionable Services**

No payment is to be made for service which is considered to be excessive, or questionable to the degree that any of the following standards apply:

- a. The service is not listed in this schedule or, the service does not comply with the standards and requirements concerning the reasonableness and necessity, quality, coordination, and frequency of services; or
- b. The service was performed by a provider prohibited from receiving reimbursement; or
- c. The service is not usual, customary, and reasonably required for the cure or relief of the effects of a compensable injury, or
- d. The service is not listed in the RBRVS schedule.

3. **Medical Necessity**

All services and supplies provided to injured workers must be medically necessary. Medically necessary means any medical service or supply which is:

- a. Provided as remedial treatment for an on-the-job illness or injury, or
- b. Appropriate to the patient's diagnosis, or
- c. Consistent with the location of service, or
- d. Consistent with the level of care provided, or
- e. Widely accepted by the practicing peer group, or
- f. The service is not listed in this medical fee schedule.

4. **Billing Disputes**

- a. To resolve billing disputes, the Labor Commission utilizes this medical fee schedule and other standard industry protocols including, but not limited to, the **Complete Global Service Data for Orthopedic Surgery**, published by the American Academy of Orthopedic Surgeons.
- b. The charge exceeds the provider's current charge for the same type of service in cases unrelated to workers' compensation injuries; or
- c. The charge does not comply with standards and requirements, concerning the cost of treatment; or
- d. The charge is described by a billing code that does not accurately reflect the actual service provided.

B. HOSPITAL REIMBURSEMENT

The Labor Commission does not have a hospital facility fee schedule. However, reimbursement for hospital services performed by a physician as defined in §34A-2-111, is subject to the Utah fee schedule per §34A-2-407(8)(b). Carriers and self-insured employers may reimburse hospitals per contracted rates or UCR.

Physicians Services

Physicians in the State of Utah are defined as doctors of Medicine, Osteopaths and Chiropractic, who are licensed as physicians to practice in the state of Utah. For payment purposes, the definition of physician is §34A-2-111 UCA.

C. NON-PHYSICIAN SERVICES

The following medical providers may provide services only under the direction of, or by the prescription of, a licensed physician: Registered physical therapists, Registered occupational therapists, Registered nurses; Licensed practical nurses; Licensed psychologists, speech pathologists and audiologists, and physicians extenders. All such services rendered by non-physician providers will either be billed separately by the physician or itemized and identified as a portion of the bill of the physician (except for physical therapist or occupational therapists services in their own field). (See Modifier +-83)

Certified, Registered nurse anesthetists may also bill separately, but must be identified by their credentials on the billing. (See Modifier +-83.)

Acupuncturists, Naturopathic providers may only provide care if the care has been preauthorized by the payor.

Massage therapy is not paid for as a stand alone code. It must be administered by those recognized professionals specified in the fee schedule and billed according to the restorative section rules.

D. SURGICAL PRE-AUTHORIZATION

As required by rule R612-2-4, “Hospital or Surgical Pre-authorization, Any ambulatory surgery or inpatient hospitalization, other than a life or limb threatening admission allegedly related to an industrial injury or occupational disease, shall require pre-authorization by the employer/insurance carrier.”

E. CHANGING OF CODE NUMBERS ON BILLINGS

Physicians’ code numbers on billings are to be supported by the appropriate documentation as to the level of service or code billed. **Disagreements between carrier and physician as to code changes have been addressed in the Labor Commission’s Rule R612-2-24, Review of Medical Payments.** If the disagreement cannot be worked out between the carrier and physician, the Labor Commission will review the issue and make a final ruling as per 11-1-D of the above mentioned rule.

A processor of industrial fee claims may change the code number supplied by the physician under the following circumstances:

1. When there is a code that more clearly identifies the nature of the services than the code used by the physician.
2. When the identified service is a portion of a larger procedure and included in the fee for the larger procedure, such as “global services.”

3. When the number is incorrect for the services described.

Whenever a code number of a physician's bill is changed by a reviewer, the reason for that change **must be** identified to the physician with his **payment as per Labor Commission Rule R612-2-23, Adjusting Relative Value Schedule (RVS) Codes**. The physician should be given the name and phone number of the claims processor, and the physician advised to call, if necessary, and discuss the matter if unsatisfied. **The procedure for resolving disputes over fees for medical services is addressed in the Labor Commission's Rule R612-2-24, Review of Medical Payments.**

III. UTAH LABOR COMMISSION SPECIFIC GUIDELINES

A. MODIFIERS

1. **In addition to modifiers defined in the current CPT schedule, the Utah Labor Commission has identified the following to also be used for workers' compensation medical care:**

-83 Assistant Paramedical Personnel: In limited circumstances, services may be performed by paramedical licensed personnel as listed below, under the supervision of a licensed physician. These should be billed for by the physician at the percentages listed below of the amount that would be paid had a physician performed those services. These individuals should be qualified, competent and licensed in the state of Utah to carry out the services performed.

They may include the following:

Physician Assistants	75%
Nurse Practitioners	75%
Medical Social Workers	75%
Nurse Anesthetists	75%
Psychologists	100%

Modifiers: Clarification on:

80 for Assistant Surgeon: MD's, DO's, and Podiatrists
81 for Minimum*

*A listing of procedures that qualify for an assistant at surgery can be found at: <http://cms.hhs.gov/providers/pufdownload/rvudown.asp>

Paramedical individuals billing separately:

Other paramedical assistants, including surgical assistants are not to bill separately for work on industrial injury workers.

Home Health Care*

RN	75%
LPN	55%
Home Health Aide	50%*

* The codes billed for home health care include travel time.

TC Technical Component: Under certain circumstances, the technical component alone may be identified. [See definition of technical component under Radiology Ground Rules.] Under those circumstances, the technical component is identified by adding this modifier (TC) to the usual procedure number.

For Home Health Codes 99500 through 99602

All include mileage and travel time.

RN	\$80/2hr.
LPN	\$55/2hr.
Home Health Aide	\$15/hr. + \$6 additional 30 min.
Speech Therapists	\$75/visit

B. MULTIPLE OR BILATERAL INJURIES OR SURGICAL PROCEDURES PERFORMED AT THE SAME OPERATIVE SESSION– (Use Modifiers -50 and -51)

1. **Primary Procedure:** Should be billed at 100% of the profile fee.
2. **Lesser Procedures:** These are called secondary procedures performed through the same operative incision, or that are performed in the same general operative area, which add significant time or complication shall be billed at 50% of the relative value, unless they are an integral part of the primary procedure, in which case no additional fee is charged.
3. **Should Not Bill:** Procedures that are uneventful and performed through the same incision or in the same operative area and do not add significant risk or time to the primary procedure. **Examples:** Lysis or excision of scar tissue, a reasonable amount of debridement, removal of loose bodies, etc.
4. **Should Not Be Billed for in Addition To:** Care of wounds, including debridement in connection with open fractures or other deep structures requiring repair such as tendons, nerves, bone, blood vessels, etc, **unless** the laceration or wound necessitates a surgical procedure **significantly greater** than the operative incision that would have been necessary for repair of the underlying structures.
5. **Secondary Surgical Procedures Performed at the Same Operative Session,** but requiring a separate, remote operative site and preparation from any other, shall be billed at 75% of the profile.
6. **Second and Additional Surgical Procedures in Each Incision, Area or Region** will be billed at 50% of the unit value.
7. **When medical care is the treatment of one injury and surgical care is the treatment of a separate injury,** bill both at 100% of usual fees if they

represent significant time and complication of treatment. Routine care of these minor non-surgical injuries carried out in conjunction with major injuries should only be billed in addition when they add significant complexity or time to the care that would be required by the major injuries.

8. **Diagnostic arthroscopy** should be billed at 50% when followed by open surgery.
9. There is **no separate fee** when it is followed by arthroscopic surgery.
10. **Whenever the descriptor refers to “each”** the rules for **multiple** surgery apply.
11. **Spinal procedures are coded and reimbursed based on the current CPT. When performing bilateral injections, use the 50 modifier unless otherwise defined by the CPT. Maximum of six (6) spinal injections per visit. Preauthorization required.**
12. **Summary:**
Primary Procedure B – 100%
Secondary Procedures Same Incision, Region or Area – 50%
Secondary Procedures in Remote Areas – 75%
Additional Procedures – 50%
Bilateral B – 75%
13. **See Integumentary system for lacerations.**

C. COST OF MATERIALS (COM)

Certain supplies and materials are to be provided by the physician that are usually included with the visit or other services performed. Fees covering ordinary dressings, materials or drugs used in diagnosis and treatment shall not be charged for separately, but shall be included in the amount for the office or hospital treatment. If the record of the case shows that it was necessary to use an extraordinary amount of dressing material or drugs, these will be paid for using – ALPHA – Numeric HCPCS Level II Codes. Special materials and supplies may be billed at cost plus 15%.

D. SPECIAL REPORT – Use CPT Modifier -22 when coding for these services and it should include medical document support.

A service that is rarely provided, unusual, variable, or new may require a special report in determining medical appropriateness of the service. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure; and the time, effort and equipment necessary to provide the service. Additional items which may be included are:

The medical provider is asked to provide a narrative or treatment summary;

- * Fill out forms for the patient or payor, or answer questions that are not included in the usual required reporting for the Evaluation Management codes.
- * Complexity of symptoms, final diagnosis, pertinent physical findings, diagnostic and therapeutic procedures, concurrent problems, and follow up care.

Recommendations: In this particular situation, a physician should provide supporting documentation and **may bill the extra time necessary to complete information** that is in addition to the usual required reporting code.

E. NON COVERED PROCEDURES

“Category III T Codes” are experimental codes and are currently not covered procedures for Utah’s injured workers.

F. CODES WHICH HAVE BEEN ASSIGNED A “O” RVU VALUE

Artificial discs, percutaneous discectomies, IDEPT, thermo rhizotomies and other heat or chemical treatments for discs are still considered investigational. VAXD or other unique mechanical vertebral traction devices will not be reimbursed. Massage therapy is not paid for as a stand alone code. It must be administered by those recognized professionals specified in the fee schedule and billed according to the restorative section rules.

Formal research is needed to demonstrate value to Utah’s injured workers before assigning any reimbursement value. The provider may consult with the payor seeking preauthorization of such treatment and the payor may agree to reimburse on an individual basis. Providers may also present to the Medical Fee Committee evidence a procedure’s efficacy for consideration to be added to the fee schedule. Other procedures which have been assigned a “0” RVU value include:

93760 & 93762	Thermograms
95832 (part of E&M)	Muscle Testing
95833 (part of E&M)	Muscle Testing
95834 (part of E&M)	Muscle Testing
96000	Computer based Motion Analysis
96001	With Plantar Pressure Measurements
96002	Dynamic Surface EMG
96003	Dynamic Fine Wire EMG
96004	Physician Review and Interpretation of Comprehensive Based Motion Analysis
97005	Athletic Training Evaluation
97006	Athletic Training Reevaluation
97810	Acupuncture
97811	Acupuncture
97813	Acupuncture
97814	Acupuncture
99090 (part of E&M)	Analysis of Date, now BR
98960	Patient Education Codes (Use 97535)
98961	Patient Education Codes (Use 97535)
98962	Patient Education Codes (Use 97535)

Special note: BILLED AS SUPPLIES, REIMBURSED AT COST + 15%

G. WORKERS' COMPENATION RULES – HEALTH CARE PROVIDERS

1. Definitions	R612-2-1
2. Authority	R612-2-2
3. Official Forms	R612-1-3
4. Supply Rule	R612-2-15
5. Utilization Review Rule	R612-2-26
6. Restorative Service Rule	R612-2-3
7. Medical Disputes	R612-2-24
8. Discounting (Lump Sums Settlement)	R612-1-4
9. Interest (on benefits)	R612-1-5
10. Hospital or Surgery Pre-Authorization	R612-2-4
11. Regulation of Medical practitioner Fees	R612-2-5
12. Fees in Cases Requiring Unusual Treatment	R612-2-6
13. Who May Attend Industrial Patients	R612-2-8
14. Insurance Carrier's Privilege to Examine	R612-2-7
15. Changes of Doctors and Hospitals	R612-2-9
16. Interest for Medical Services	R612-2-13
17. Hospital Fees Separate	R612-2-14
18. Charges for Ordinary Supplies, Materials or Drugs	R612-2-15
19. Charges for Special or Unusual Supplies, etc.	R612-2-16
20. Fees for Unscheduled Procedures	R612-2-17
21. Dental Injuries	R612-2-18
22. Ambulance Charges	R612-2-19
23. Travel Allowance and Per Diem	R612-2-20
24. Notice – Denial of Liability	R612-2-21

H. GENERAL GUIDELINES FOR REIMBURSEMENT

1. **Restorative services are an integral part of the healing process for a variety of injured workers.** Recognizing this, the Utah Medical Fee Schedule includes codes for restorative services, i.e., those modalities, procedures, tests, and measurements in the Physical Medicine Section, codes 97010 through 97750, representing specific therapeutic procedures performed by medical doctors, chiropractic physicians, licensed physical and occupational therapists and other physicians. All medical providers billing under CPT codes 97001 through 97703 are limited to payment of a maximum of three (3) procedures/Units per visit six (6) if treating different sites for an on-the-job injury/injuries even if billing for additional procedures. The payer shall pay the three highest of the billed procedures for each treatment site for the visit.
The following criteria must be met in all cases where restorative services are rendered in order for a service to qualify for reimbursement:
 - a. The patient's condition must have the potential for restoration of function.

- b. The treatment must be prescribed by the authorized attending or treating physician.
- c. The treatment must be specific for the improvement of the patient's condition.
- d. **The restorative services must be provided under the reporting requirements of rule R612-2-3 of the Workers' Compensation Rules and Regulations of the Labor Commission:**
 - * The chiropractor shall file Form 123, "Physicians Initial Report," with the Labor Commission and the carrier/self-insured employer within one week of the initial examination.
 - * S.O.A.P. Notes (subjective, objective, assessment and plan/procedure) or progress notes must be sent to the insurance carrier/self-insured employer by all providers at the time of billing or at the request of the Commission, insurance carrier or self-insured employer.
 - * All providers billing under the restorative services section shall file a Restorative Services Authorization Form 221 with the insurance carrier/self-insured employer and the division within 10 days of initial treatment. All such providers must submit progress notes or a progress summary when billing for services and on request by the insurance carrier.
- e. The physician or therapist must be in constant attendance during the providing of services.
- f. Physical therapy, consisting of modalities only, is generally inappropriate beyond the first visit post-injury, unless the treatment also includes hands-on-procedures. A program of home treatment should be considered when modalities are the only treatment needed.
- g. For acute conditions, the patient should be closely followed by the physician, with no less than one physician follow-up every three weeks.
- h. Daily therapy is rarely needed, with documentation of objective improvement per RSA rule utilizing the **Form 221**.
- i. In addition to the foregoing, there is an affirmative duty placed on the provider of restorative services to teach the patient the principles on which therapy is based, as well as those parts of the therapy which he, the patient, can self-administer. This should be done under supervision during restorative treatment in order to maintain the level of function achieved during the restorative therapy. When it is determined that no further restoration can be achieved from therapy, the design of a independent maintenance program and the instruction for carrying out that program for patient must be concurrently completed in order that additional cost may not be incurred. Therapy performed by the patient, or other lay person, after proper instruction, is not reimbursable, even when supervised by a therapist or physician.
- j. When patients do not show measurable progress, further treatment will not be reimbursable, per **RSA 221**.

2. **Special Services**

- a. “Work hardening” and similar programs are to be billed using the listed physical therapy schedule. More specific and comprehensive programs are rehabilitative in nature and thus not covered separately, but may be undertaken upon agreement with the carrier pursuant to “b” [See below].
- b. If the carrier is of the opinion that these special services are desired for their purpose they may authorize in advance with payment agreed upon, including duration, frequency and number of treatment visits.

3. **Mechanized/Computerized Evaluation with Printout of Joint/Muscle/Trunk Function Whether Isotonic, Isometric and/or Isokinetic and Functional Evaluations of Patient and Capabilities**

- a. All assessments/evaluations should be done only when necessary and shall be consistent with the patient’s medical diagnosis and dysfunction. The assessment shall be for the benefit of therapy and not for purposes of research.
- b. Such testing requires a specific prescription by the physician.
- c. Standardized testing and/or testing with special standardized equipment should be done on patients where such information is needed to establish an adequate baseline on which to base treatment, establish functional skills relative to the job, or serve as a baseline to objectively monitor patient progress.
- d. Such equipment should be reputable with appropriate and reasonable information available on reliability and validity. Where appropriate, the subject can serve as the control for normal and, where available, other normal performance guidelines should be used as reference.
- e. Standardized tests utilized shall be appropriate to the type of disability, have forms for **the subject’s age and have standard administration procedures.**
- f. A report is to accompany the bill.

4. **Multiple Treatment Areas**

For multiple treatment areas when treatment is pre-authorized to more than one area, a single office visit charge will remain, and not over two additional modalities can be billed for the first injury. For a second site, up to 3 additional modalities can be billed for.

5. **Transcutaneous Electrical Nerve Simulators (TENS)**

- * TENS must be prescribed by a physician or under the physician’s prescription. (See 64550)
- * Prior diagnostic testing must be performed to determine the efficacy of TENS in control of the patient’s chronic pain.

- * TENS testing and training is limited to four (4) sessions and a 30-day trial period. To exceed this limitation, written documentation of a medical necessity is required.

6. **Maintenance or Palliative Treatment**

- a. Since the maintenance of health is of benefit to everyone and an individual responsibility, utilization of fitness centers and associated equipment or services solely for health maintenance is not covered under workers' compensation.
- b. Since workers' compensation services must be medically necessary in the treatment of on-the-job illness or injury, no reimbursement will be made for medical services rendered for the prevention or the recurrence of illness or injury.

7. **Maximum Allowable Procedures**

All medical providers billing under CPT code 97001 through 97703 are limited to payment of a maximum of three (3) procedures/units per visit; six (6) if treating different sites for an on-the-job injury/injuries even if billing for additional procedures. The payer shall pay the three (3) highest of the billed procedures for each treatment site for the visit.

The Utah Labor Commission recognizes the entire spine as one region, for billing purposes.

8. **Physicians – Office Visits and Modalities**

Under most circumstances, medical, osteopathic, chiropractic physicians performing restorative services will use the 99201 or 99202 code for new patients and 99211 or 99212 for established patients. Other office medical codes in the most current AMA CPT-4 may be used when warranted, and when they are substantiated by a report of the examination performed which specifies the findings of the examination and the subsequent treatment rendered. If an office visit is billed, 2 other modalities may be billed per visit. If an office visit is not billed, 3 modalities may be billed per visit.

All services performed should be itemized, even if not billed (NC).

9. **Physical Therapy Provided by Physicians (MD's)**

- a. **Initial Office Visit (New Patient):** A physician may charge and be reimbursed for an initial office visit to examine and evaluate the patient and perform physical therapy.
- b. **Follow-up Office Visit (Established Patient):** A physician may charge and be reimbursed for a follow-up visit and physical therapy only if new symptoms present the need for reexamination and evaluation. Documentation of medical necessity must be submitted

for reimbursement to be made and the new diagnosis must be reported to the carrier on the proper form.

10. **Electrophysiologic Testing**

- a. **Referrals for Testing:** Physicians referring patients for electrophysiologic testing should provide the testing physician with specific information about the patient. This information would include but not be limited to, the working diagnosis, prior testing results, and what issues the electrical testing is to clarify.
- b. **Testing with Electromyography and Nerve Conduction Studies:** There are situations in which both electromyography and nerve conduction studies must be accomplished, such as when defining whether neuropathy is of demyelinating or axonal type. Seldom is it required that both studies be accomplished in straightforward condition of median and ulnar neuropathies or peroneal nerve compression neuropathies.
- c. **Multiple Extremity Testing:** It is rarely necessary for more than two extremities to be examined, and it is never necessary for four extremities to be examined.
- d. **Radiculopathies:** There is minimal justification for performing nerve conduction studies when a patient is presumed to have symptoms on the basis of a spinal root process, (radiculopathy).
- e. **Number of Tests to be Completed:** To list each specific nerve which might be studied and determine limits of the study techniques permitted is not practical. There must be a latitude provided to the examining physician which permits judicious and appropriate extension in the examination as required by the types of abnormalities be identified. Clearly, if normal values are being recorded, there is in most cases, less rather than greater justification for extending the scope of the examination.
- f. **Reimbursement:** The reimbursement for electrophysiological testing under the current RBRVS is adequate, and includes both a professional and technical fee. If the physician uses a facility's equipment and/or technician for the testing, the bill submitted will be for the professional component only with a modifier -26.
- g. **Upper Extremity:** Distal entrapment syndromes, encompassing the median and ulnar nerves, are generally readily suspicioned and clinically diagnosed conditions, known by most physicians. In the case of presumed carpal tunnel syndrome, the ulnar nerve in the same extremity should also be tested to evaluate for the possibility that multiple neuropathies are present in the same extremity. If both median and ulnar values are abnormal, the patient's other extremity should then be examined to assess for the possibility of there being widespread polyneuropathy. Charges for the mid-palmer parameters, inching techniques, should not be greater than charges for routine single nerve stimulation.

- h. **Lower Extremity:** A similar situation would be appropriate should the patient be under evaluation for a condition that involved one lower extremity neuropathies.
- i. **Who Should Perform Tests on Utah's Injured Workers:** Electromyographic examinations on industrially-injured patients in Utah should be accomplished by physicians. Nerve conduction studies should be done by a qualified technician working directly under the supervision of a physician, **billing** at the percentages listed under Section III, page II, (75% of the amount a physician would be paid had a physician performed those services). These individuals should be qualified, competent and licensed in the state of Utah to carry out the services performed.

11. **Somatosensory Evoked Potential Monitoring During Surgery**

The following Medicare guidelines have been adopted to assist surgeons for those conditions that currently warrant Somatosensory Evoked Potential Monitoring during Surgery. At this time there is no additional professional fee payment to be made to the surgeon, in that "real time monitoring" provides the surgeon with prevention of complications. Somatosensory Evoked Potential Monitoring is an ongoing science and the committee will reevaluate these guidelines as the value and conditions for monitoring become clearer with further medical studies.

Inter-operative Neurophysiological Testing may be used to identify/prevent complications during surgery on the nervous system, its blood supply, or adjacent tissue.

Monitoring can identify new neurologic impairment, identify, or separate nervous system structures (e.g., around or in a tumor), and can demonstrate which tracts or nerves are still functional. Intra-operative neurophysiological testing may provide relative reassurance to the surgeon that no identifiable complication has been detected up to a certain point, allowing the surgeon to proceed further and provide a more thorough or careful surgical intervention than would have been provided in the absence of monitoring.

Some high-risk patients may be candidates for a surgical procedure only if monitoring is available.

Indications and Limitations of Coverage and/or Medical Necessity

- A. Based on information in the scientific literature, Intra-operative testing is indicated with the following types of surgery:
 - surgery of the aortic arch, its branch vessels, or thoracic aorta, including internal carotid artery surgery, when there is risk of cerebral ischemia;
 - resection of epileptogenic brain tissue or tumor;
 - protection of cranial nerves;

- * tumors that are optic, trigeminal, facial, auditory nerves
- * cavernous sinus tumors
- * oval or round window graft
- * endolymphatic shunt for Ménière's disease
- * vestibular section for vertigo
- * correction of scoliosis or deformity of spinal cord involving traction on the cord
- * protection of spinal cord where work is performed in close proximity to cord as in the removal of old hardware or where there have been numerous interventions
- * decompressive procedures on the spinal cord or cauda equine carried out for myelopathy or claudication where function of spinal cord or spinal nerves is at risk
- * spinal cord tumors
- * neuromas of peripheral nerves or brachial plexus when there's risk to major sensory or motor nerves
- * surgery for intracranial AV malformations
- * surgery for intractable movement disorders
- * arteriography, during which there is a test occlusion of the carotid artery
- * circulatory arrest with hypothermia
- * distal aortic procedures, where there is risk of ischemia to spinal cord; and
- * leg lengthening procedures, where there is traction on sciatic nerve or other nerve trunks
- * basil ganglia movement disorders
- * surgery as a result of traumatic injury to spinal cord/brain

B. Medicare requires that this test be requested by the operating surgeon. This service can not be separately billed to (or paid by) Medicare if performed by:

- * the operating surgeon;
- * the technical/surgical assistant;
- * the anesthesiologist rendering the anesthesia; or
- * a hospital employee.

C. *The physician must be performing intra-operative testing in real time. While the physician may monitor more than one patient at a time he/she must be solely dedicated to performing this service. The physician may be in the operating room or at a remote site with monitoring performed utilizing digital transmission or closed circuit television. There must be provisions for continuous or immediate contact with the surgeon to report changes.

IV. UTAH LABOR COMMISSION SPECIFIC CODE GUIDELINES

Some variances in the Utah adaptation of the RBRVS have been made to allow for more clarity of the services rendered relating to billing.

Unless otherwise identified in the following, the most current AMA CPT-4 coding guidelines apply for Medicine, Evaluation & Management, Restorative Services, Radiology, Pathology & Laboratory, Anesthesia and Surgery.

A. MEDICINE

1. Impairment Rating

- a. The treating physician is the person most knowledgeable regarding the condition, progress and final status of the injured employee and, for this reason, shall be in the best position to render an impairment rating, and is encouraged to do so.
- b. The rating should be based solely on the objective maximum achieved condition of the patient. This service of calculating an impairment is not considered a portion of any of the services previously rendered and is not included in the routine post-operative care. There are special code numbers for payment for this service. The attending physician is encouraged to complete the case unless he feels that there is some specific reason that the doctor-patient relationship may be impaired by making such a determination.
- c. If for any reason the attending physician prefers to not make this evaluation, the insurance carrier should be notified in order that a decision can be made as to a proper referral for the evaluation. The physician may make a recommendation to the carrier of a proper referral.
- d. The following codes are used to report evaluation and management services provided to patients when the physician is providing an impairment rating to the insurance carrier and/or employer. Impairment ratings include evaluation of the patient, review of records, and diagnostic studies where necessary.
- e. The **Medical Report at Stability** is a comprehensive report prepared after the injured worker is medically stable. As this is an administrative document, the final disposition of the examiner should include the following information:
 - * **Diagnosis:** The examiner needs to clearly state the diagnosis and have it clearly substantiated from the medical record. The examiner should also define, as best as possible, their impressions as the relationship of the diagnosis and the industrial event. It is recognized that in many cases specific pathologic diagnoses are not clearly evident. The examiner has the responsibility to provide a diagnosis as valid as the clinical findings allow.
 - * **Stability:** The examiner must declare the patient medically stable. The examiner must state that it is his/her medical

opinion that all that can be done medically for the patient has been done, and that the patient is not expected to improve with further medical care and/or time. It is important to note that “medically stability” does not always mean that ongoing care is not needed.

- * **Calculation of Impairment:** Using valid, standardized rating criteria, the examiner should calculate the residual impairment, based on clinical findings established in the medical record.
- * **Apportionment:** The examiner must identify and list any factors, physical and non-physical, which add to the impairment, but are not directly resultant from the injury.
Capabilities Assessment: Following the guidelines established by the U.S. Department of Labor, a limited functional capacity assessment should augment the medical record. Not only does this clearly establish physical abilities, but also facilitates the patient/employer relationship for return to work. (See Physical Demands Characteristics of Work Chart in the Guide to Impairment Rating Fourth Edition.)
- * **Future Medical Treatment:** The examiner should identify future medical treatment that may be required to maintain the stability of the patient’s medical condition.

2. **Impairment Rating by Treating Physician**

The following codes are used to report the impairment rating by the treating physician. For an impairment rating by an independent physician see code 99466.

Codes 99455 and 99456 are to be used by physicians on the final visit when stability is declared. These codes are to be used alone and **include** concurrent evaluation and management services.

Code		Unit Value
99455	Work related or medical disability examination by treating physician that includes: completion of a medical history commensurate with the patient’s condition – performance of an examination commensurate with the patient’s condition – formulation of a diagnosis, assessment of capabilities and stability, and calculation of impairment – development of future medical treatment plan – and completion of necessary documentation/certificates and report. With 2.0 RVU assigned/30 min.	2.0

3. **Impairment Rating by Independent Physician**

Code		Utah Value
99456	Work related or medical disability examination by other than the treating physician that includes: completion of a medical history commensurate with the patient's condition – performance of an examination commensurate with the patient's condition – formulation of a diagnosis, assessment of capabilities and stability, and calculation of impairment – development of future medical treatment plan – and completion of necessary documentation/ certificates and report. Assigned 2.65 units/30 min.	2.65

4. **Special Medical Evaluations (Independent Medical Examinations)**

Special Medical Evaluation is specialized evaluation of an ill or injury patient. These exams are initiated or requested by the insurance carrier or their authorized agent. An independent medical exam includes detailed review of medical records for the patient, which may include treatment prior to the date of injury. This review of records will include, but is not limited to chart notes, dictations, radiology reports and laboratory studies. Independent medical exams also include a complete and thorough physical exam of the patient. A detailed report includes findings and conclusions from the record review and the physical evaluation of the patient must be submitted to the carrier.

Services rendered that are beyond the scope of consultations, referred as **Special Medical Evaluations, must be agreed upon ahead of time and are outside the scope of the RBRVS.**

The following code is to be used to report special medical evaluations:

Code	
99469	Special Medical Evaluations that include review of records and diagnostic studies and evaluation of the patient and report. Reimbursement for Special Medical Evaluations will be given individual determination.

B. RESTORATIVE SERVICES

- Some variances in the Utah adaptation of the RBRVS have been made to allow for more clarity of the services rendered relating to billing for restorative services, which includes medical, osteopathic and chiropractic physicians, and occupational and physical therapist services. All Restorative Services **must conform** to the Labor Commission's Restorative Rule R612-2-3. "Filings." RSA Form 221 must be submitted to the carrier or self-insured employer for authorization. **Some changes have been made in**

either the unit value or the Utah created procedure codes of some of the associated services.

2. **Codes Which Have Been Assigned A “O” RVU Value**

- * 97020 Microwave Therapy
- * 97024 Diathermy
- * 97026 Infrared Therapy
- * 97028 Ultraviolet Therapy
- * 97005 Athletic Training Evaluations
- * 97006 Athletic Training Reevaluation
- * 98960 Patient Education Codes (Use 97535)
- * 98961 Patient Education Codes (Use 97535)
- * 98962 Patient Education Codes (Use 97535)

3. **Physical Therapy/Occupational Therapy**

- a. Physical therapists will use codes 97001 through 97770, except in special circumstances. In addition to this office basic charge, they may bill for not more than 2 additional modalities/procedures from this section per day when necessary and performed. Please identify all procedures performed in the medical record, even if not billed.
- b. Physical therapists may make additional billing, when justified, under special circumstances. Such additional billing requires prior authorization from the appropriate carrier. Such additional billing can be accomplished by using the Physical Medicine codes 97001 through 97750. An example of such a special circumstance would be if the therapist were treating a neck and an arm, or a spine and a leg, at the same visit.

Code		Unit Value
97001 & 97003	Per CPT descriptor and only used one time per patient.	1.5
97002 & 97004	Should not be used as an office charge only, but must reflect that a reevaluation was necessary and performed. Generally this should only be used every 6 visits, unless there is objective documentation that an evaluation and modification of treatment was necessary.	1.0
97010	Application of a modality to one or more areas; hot or cold packs.	0.11

- c. Two or more areas of the spine will not be considered a special circumstance, as the spine shall be considered on unit. The Utah Labor Commission recognizes the entire spine as one region. (This also applies to manipulation provided by physicians only.)
- d. All services provided should be itemized even if not billed.

- e. Independently practicing registered physical or occupational therapists:
 - * To be considered independently practicing, a therapist must operate a private office or rehabilitation clinic devoted exclusively to providing rehabilitative services to patients.
 - * The office or clinic must have its own professional license from the applicable local government.
- f. Registered therapists may bill for services related to range of motion (ROM) exercises and gait training. Reimbursement may be made for ROM exercises for a specific disease or injury only when training for those services are performed by a licensed therapist (see Procedure Code 97110). Reimbursement may be made for gait evaluation and training for claimants impaired by neurological or skeletal abnormalities (see Procedure Code 97116). However, records must reflect the degree of loss resulting from the specific disease or injury, as well as the degree of restoration attributable to the therapy program.
- g. An independently practicing therapist may be requested by a physician or other party to provide a written assessment to assist in the determination of the degree of restorative potential and the development of a treatment plan. This independent assessment by a therapist is reimbursable as a separate service only when treatment is not assumed by the evaluating therapist or his or her associates in a clinic. Necessary consultation between the physician and therapist to develop or modify an individual plan of treatment administered by the same therapist is a necessary service and is included as part of the allowance for procedures and therapies provided to the patient. For this service, use the appropriate most current AMA CPT-4 consultation code.
 - * A physician therapist is not to charge for a consultation and/or a report unless this is specifically requested.

4. **Manual Therapy Techniques**

Code	
97140	For Coding purposes the Utah Labor Commission recognizes the entire spine (head to pelvis) as one region and multiple spine codes are not to be used more than one time per treatment session.

5. **Osteopathic and Chiropractic Manipulative Treatments**

Code	
98925	Osteopathic manipulative treatment (OMT) one or more body regions. For coding purposes the Utah Labor Commission recognizes the entire spine (head to pelvis) as one region and multiple spine codes are not to be used more than one time per treatment session.
98940	Chiropractic manipulative treatment (CMT): spinal, one or more regions

	For coding purposes the Utah Labor Commission recognizes the entire spine (head to pelvis) as one region and multiple spine codes are not to be used more than one time per treatment session.
--	---

The Utah Labor Commission does not recognize CPT codes 98941 and 98942 for coding purposes.

6. **Educational Codes/Work Conditioning and Work Hardening Codes**

The most current AMA CPT-4 codes are applicable with the following definitions: [See the CPT-4 time increments.]

Code	
97530	To be used per the descriptors in the 2007 AMA CPT-4, and billed within capitation limits.
97535	<u>Individual Education and Training</u> – Patient education to improve functional performance at work, work modification education and self care/home management training. This includes training in activities of daily living (ADL), lifestyle changes, and making specific recommendations and restrictions, if needed, to accommodate the patient’s return to work. Direct one-on-one contact by the provider. Billed outside the capitations with a limit of 4 units per injury claims.
97537	<u>Community/Work Reintegration Training</u> – (e.g., shopping, transportation, money management, avocational activities and/or work environment-modification analysis, work task analysis), direct one-on-one contact by provider.
97545	<u>Work Conditioning/Work Hardening</u> – A licensed practitioner, supervised, work-related, intensive goal-oriented treatment program specifically designed to restore an individual’s systemic, neuro-muscular-skeletal (strength, endurance, work conditioning should only be continued as long as objective improvement by the patient is documented. Pre-authorized: (Provider to specify amount of time anticipated, initial two hours). (Each additional hour use code 97546.)
97546	<u>Work Conditioning/Work Hardening Pre-authorization</u> (Each additional hour.)
97150	<u>Group Education</u> : Training and activities of daily living, life style changes, actions to improve functional performance and work modification where appropriate in groups of 2 or more. (Pre-authorization is required per 30 minutes billed outside of capitation. Limit of 4 units per injury.)

7. **Functional Capacity Evaluations**

- a. **Limited Functional Capacity Evaluations (97750)** – Definition: “This determines a person’s dynamic maximal repetitive lifting, walking as patient reported standing and sitting tolerance.

Applications – This test is used primarily to determine a patient’s functional ability profile level to be determined by a physician following the description of the Utah Medical Association’s publication of “Workplace Functional Ability: Medical Guidelines.” This test can be used to determine if an individual is progressing or has reached a plateau as related to function. The test may also be used to work restrictions and to assist employers in determining accommodation.

(Provider to specify amount of time anticipated.)

Maximal Time: 45 minutes (15 minute segments)

Pre-authorization required

- b. **Full Functional Capacity Evaluations (97750)** – Definition: This test described information concerning an individual’s maximum and repetitive lifting, walking, standing, sitting, range of motion, predicted maximal oxygen uptake, as well as ability to stoop, bend, crawl or perform work in an overhead or bent position. In addition, this test includes reliability and validity measures concerning the individual’s performance (i.e., grips, tests, repeated strength tests or distraction tests). Optimal measures may include isometric testing, pushing, pulling, hand dexterity, grip strength, etc.

Applications: This test is used to determine a patient’s general physical capability. It may be used when no job description is provided or the individual does not have a job to return to. This test is helpful for vocational rehabilitation counselors to determine capabilities for retraining into a different vocation. In addition, this test can be used to make disability and/or Social Security determinations. This can be used to make future recommendations.

Code	
97750	Full Functional Capacity Evaluation: (Provider to specify amount of time anticipated.) Maximum time: Up to 2.5 hours (15 minute segments) Pre-authorization required

- c. **Work Capacity Evaluation (97750)** – Description: This test determines a patient’s capabilities based on the physical aspects of a specific job description. The capabilities measured may vary greatly depending on the physical requirement of the job that the patient is to be compared against.

Code	
97750	Work Capacity Evaluation: (Provider to specify amount of time anticipated.) Maximum time: Up to 2 hours (15 minute segments) Pre-authorization required

Application: The most common application for a work capacity evaluation is to determine an individual’s capability compared to his/her job and for preparation for return-to-work. A test can also be used to help an employer make reasonable accommodations if a patient has a documented disability.

- d. **Job Analysis (97750)** – Description: Job Analysis is performed at a work site to determine physical aspects of a particular job. The job analysis may or may not include pictures of the essential aspects of the job.

Application: Job Analysis is generally used to create work capacity evaluation to determine an individual’s ability to perform specific aspects of a particular job. This can be helpful in determining an individual’s ability to return to work. A job analysis can also help an employer to determine physical job descriptions, which include essential and non-essential aspects of a particular job. A Job Analysis can be used if an employer decides to perform pre-work placement tests. A Job Analysis can also be used in making appropriate ergonomic adjustments to improve the safety of a particular workstation.

Code	
97750	Job Analysis: (Performed at work site, each 15 minutes.) Anticipated Time: Variable depending on the distance traveled and job analyzed. Pre-authorization required

8. **Evaluation Codes**

Codes 97001, 97002, 97003 and 97004 are only to be used by physical therapists or occupational therapists respectively **when progress notes substantiate that the defined level of care was rendered.**

Code		Utah Value
97001	Physical Therapy Evaluation	1.5
97003	Occupational Therapy Evaluation	1.5
97002	Physical Therapy Re-evaluation	1.0
97004	Occupational Therapy Re-evaluation	1.0

Codes 99211 and 99212 are to be used by physicians (including chiropractors) *only when progress notes substantiate that the defined level of care was rendered.*

9. **Debridement** – as outlined in CPT Schedule

C. ANESTHESIA

1. **Guidelines**

- a. Medicare’s Base Units and methodology for time calculation (1 unit for 15 min. of anesthesia) is adopted with the conversion factor of \$41.00.
- b. The basic value provided in the RBRVS for anesthesia when multiple surgical procedures are performed during a single anesthetic administration is the basic value for the procedure with the highest unit value. The appropriate basic value units, modifying units and time units may be applied to each anesthetic administration.
- c. Services which may necessitate skills and time of the physician beyond that usually required (e.g., unusual forms of monitoring, severe multiple injuries or other factors requiring extended pre and/or post operative care) should be substantiated “By Special Report” (NC).
- d. When it is necessary to have a second attending anesthesiologist assist with the preparation and conduct of the anesthesia, these circumstances should be substantiated “By Special Report.” Such services shall have a Basic Value of 5.0 units plus Time Units.
- e. The minimum basic unit value for any procedure requiring endotracheal intubation for avoidance of the surgical field or to place the patient in a prone position shall be 4.0. Where the listed basic unit value is 4 or more, no additional units are warranted for endotracheal intubation. Use Modifier-22.
- f. Qualifying Circumstance codes 99100 through 99140 are not covered.

2. **Time Reporting**

Time Units will be added to the basic value for all cases at the rate of one unit for each 15 minutes or fraction thereof.

D. SURGERY

1. **Needle Procedures**

- a. Diagnostic needle procedures (Lumbar puncture, thoracentesis, jugular or femoralvein taps, subdural taps, etc.) when performd as part of the necessary workup for a serious medical illness or injury should be billed in addition to the medical care on the same day.

- b. Therapeutic procedures (injecting into cavities, nerve blocks, joint and tendon problems, etc.) (20550-20610; 64400-64450) may be billed in addition to the medical care on the same day for a new patient.
- c. Puncture of a cavity or joint for aspiration followed by injection of a therapeuticum is one procedure and should be billed as such.
- d. Therapeutic procedures (injecting into cavities, nerve blocks, joint and tendon problems, etc.) (20550-20610; 64400-64450) may be billed in addition to the medical care on the same day for a new patient.
- e. In follow up cases for additional therapeutic aspiration and/or injection when the needle procedure is the primary service, an office visit charge in conjunction with that is only indicated if there is necessary a significant re-evaluation of the patient. In this case a minimal service may be listed in addition to the injection.
- f. The above mentioned “needle” procedures do not include injections for X-ray procedures. Injection procedures in conjunction with radiological services include necessary local anesthesia, placement of needle or catheter and injection of contrast media.
- g. Immunization procedures are covered only if they relate directly to an industrial injury or exposure. They are not covered for routine services or prevention.
- h. Puncture for injection, drainage, or aspiration (62270-62287) and Nerve Blocks (64400-64640) are listed in the surgical section of the Relative Value Study. There is only one reimbursement value per procedure regardless of the time required or the specialty of the physician rendering the service. These services are coded and reimbursed as surgery. Anesthesia units are to be used only when a supplemental anesthetic is required to carry out the procedure.
- i. Trigger Point Injections:
Regardless of the number of injections or trigger points treated, trigger point injections are reported per **muscle**. Report 20552 if one or two muscles are treated. Report 20553 if three or more muscles are treated during the treatment session. Code 20553 is the maximum allowed for any one-treatment session regardless of the number of muscles treated. Do not report both code 20552 and 20553 for the same treatment session. Documentation must indicate which muscles were treated. Research has clarified that in this code number the word injections is plural and that is meant to include one or more injections. A reading of this descriptor will show that trigger point injections represent a much lesser procedure in general than the other procedures that justify a significant higher reimbursement than a trigger point injection. Thus injections is considered as plural and to refer to one or more injections in any extended anatomical site.

E. RADIOLOGY

1. **Two patterns of billing currently prevail in Radiology.** A total charge for the radiology service to include both professional fees and technical costs is made by radiologists working in offices, clinics and, under some circumstances, in hospital X-ray departments.
2. In the majority of voluntary hospital radiology departments, the radiologist submits a separate statement to the patient for his professional services – using Modifier -26. The hospital charges for the technical component (TC). A total (T) fee includes both the professional fee of the radiologist and the cost for non-physician personnel, facilities, supplies and overhead needed to accomplish the procedure. The separation of billing between the radiologist and hospital in no way implies a division of responsibility but only a needed medical service for the patient. The radiologist must retain full responsibility for his own activity and full responsibility for the supervision of the technologist, the selection and maintenance of equipment, the control of radiation hazards and the general administration of the radiology department.
3. If other physicians participate in a significant fashion in a procedure, then one must anticipate a fee for their services separate from the one asked by the radiologist.
4. The charges made by the institution cover the services of technologists and other helpers, the film, contrast media, chemicals and other materials, the use of the space and facilities of the X-ray department plus any other costs.
5. Radioisotopes, Gadolinium and comparable materials may be charged for (COM) at the provider's cost plus 15%. See 99070.
6. The professional component represents the reimbursement allowance of the professional radiological services of the physician and is identified by the use of Modifier -26. This includes examination of the patient when indicated, performance or supervision of the procedure, interpretation and written report of the examination and consultation with the referring physician.
7. The professional component is traditionally used by physicians under contract with a hospital or other facility who billed independently of the hospital or other facility. This component is payable only to the physician who renders the official interpretation or reading of the X-rays and written report. When the X-rays are reviewed by others, that service is included as a part of the basic service rendered to the patient. It is inappropriate for others to use Modifier -26 when X-rays are reviewed as part of an evaluation of a patient for an independent medical evaluation, consultation or other office visit.

F. PATHOLOGY

1. **Laboratory and Pathology:** The current RBRVS does not cover reimbursement rates for laboratory or pathology codes. These reimbursement amounts will be 150% of Utah's published Medicare carrier.
2. **The physician is allowed to bill from the RBRVS fee schedule.** A handling fee is allowed only if an outside laboratory is billing for the test. Also, a physician **may not** have a financial interest in the laboratory.

V. WORKERS' COMPENSATION RULES – HEALTH CARE PROVIDERS

R612-2. Workers' Compensation Rules – Health Care Providers.

- R612-2-1. Definitions.
- R612-2-2. Authority.
- R612-2-3. Filings.
- R612-2-4. Hospital or Surgery Pre-Authorization.
- R612-2-5. Regulation of Medical Practitioner Fees.
- R612-2-6. Fees in Cases Requiring Unusual Treatment.
- R612-2-7. Insurance Carrier's Privilege to Examine.
- R612-2-8. Who May Attend Industrial Patients?
- R612-2-9. Changes of Doctors and Hospitals.
- R612-2-10. One Fee Only to be Paid in Global Fee Cases.
- R612-2-11. Surgical Assistants' Fees.
- R612-2-12. Separate Bills.
- R612-2-13. Interest for Medical Services.
- R612-2-14. Hospital Fees Separate.
- R612-2-15. Charges for Ordinary Supplies, Materials, or Drugs.
- R612-2-16. Charges for Special or Unusual Supplies, Materials, or Drugs.
- R612-2-17. Fees for Unscheduled Procedures.
- R612-2-18. Dental Injuries.
- R612-2-19. Ambulance Charges.
- R612-2-20. Travel Allowance and Per Diem.
- R612-2-21. Notice to Health Care Providers.
- R612-2-22. Medical Records.
- R612-2-23. Adjusting Relative Value Schedule (RVS) Codes.
- R612-2-24. Review of Medical Payments.
- R612-2-25. Injured Workers' Right to Privacy.
- R612-2-26. Utilization Review Standard.

R612-2. Workers' Compensation Rules – Health Care Providers.

R612-2-1. Definitions.

- A. All definitions in Rule R612-1 apply to this section.
- B. "Medical Practitioner" – means any person trained in the healing arts and licensed by the State in which such person practices.
- C. "Global Fee Cases" – are those flat fee cases where fees include pre-operative and follow-up or aftercare.
- D. "Usual and Customary Rate (UCR)" – is the rate of payment to a dental provider using Ingenix, or a similar service, for charges for services for a particular zip code.
- E. Unless otherwise specified, the term "insurer" includes workers' compensation insurance carriers and self-insured.

R612-2-2. Authority.

This rule is enacted under the authority of Section 34A-1-104.

R612-2-3. Filings.

- A. Within one week following the initial examination of an industrial patient, nurse practitioner, physicians and chiropractors, shall file "Form 123 – Physicians' Initial Report" with the carrier/self-insured employer, employee, and the division. This form is to be completed in as much detail as feasible. Special care should be used to make sure that the employee's account of how the accident occurred is

completely and accurately reported. All questions are to be answered or marked "N/A" if not applicable in each particular instance. All addresses must include city, state, and zip code. If modified employment in #29 is marked "yes" the remarks in #29 must reflect the particular restrictions or limitations that apply, whether as to activity or time per day or both. Estimated time loss must also be given in #29. If "Findings of Examination (#17) do not correctly reflect the coding used in billing, a reduction of payment may be made to reflect the proper coding. A physician, chiropractor, or nurse practitioner is to report every initial visit for which a bill is generated, including first aid, when a worker reports that an injury or illness is work related. All initial treatment, beyond first aid, that is provide by any health care provider other than a physician, chiropractor, or nurse practitioner must be countersigned by the supervising physician and reported on Form 123 to the Industrial Accidents Division and the insurance carrier or self-insured employer.

- B.
1. Any medical provider billing under the restorative services section of the Labor Commission's adopted Resource-Based Relative Value Scale (RBRVS) or the Medical Fee Guidelines shall file the Restorative Services Authorization (RSA) form with the insurance carrier or self-insured employer (payor) and the division within ten days of the initial evaluation.
 2. Upon receipt of the provider's RSA form, the payor has ten days to respond, either authorizing a specified number of visits or denying the request. No more than eight (8) visits may be incurred during the authorization process.
 3. After the initial RSA form is filed with the payor and the division, an updated RSA form must be filed for approval or denial at least every six visits until a fixed state of recovery has been achieved as evidenced by either subjective or objective findings. If the medical provider has filed the RSA form per this rule, the payor is responsible for payment, unless compensability is denied by the payor. In the event the payor denies the entire compensability of a claim, the payor shall so notify the claimant, provider and the division after which the provider may then bill the claimant.
 4. Any denial of payment for treatment must be based on a written medical opinion or medical information. The denial notification shall include a copy of the written medical opinion or information from which the denial was based. The payor is not liable for payment of treatment after the provider, claimant, and division have been notified in writing of the denial for authorization to pay for treatment. The claimant may then become responsible for payment.
 5. Any dispute regarding authorization or denial for treatment will be determined from the date the division received the RSA form or notification of denial for payment of treatment.
 6. The claimant may request a hearing before the Division of Adjudication to resolve compensability or treatment issues.
 7. Subjective objective assessment plan/procedures (SOAP notes) or progress notes are to be sent to the payor in addition to the RSA form.
 8. **(EFFECTIVE NOVEMBER 1, 1998) Any medical provider billing under the Restorative Services Section of the RBRVS or the Commission's Medical Fee Guidelines who fails to submit the required RSA form shall be limited to payment of up to eight visits for a compensable claim. The medical provider may not bill the patient or employer for any remaining balances.**
- C. S.O.A.P. notes or progress reports of each visit are to be sent to the payor by all medical practitioners substantiating the care given, the need for further treatment, the date of the next treatment, the progress of the patient, and the expected return-to-work date. These reports must be sent with each bill for the examination and treatment given to receive payment. S.O.A.P. notes are not to be sent to the division unless specifically requested.
- D. "Form 110 – Release to Return to Work" must be mailed by either the medical practitioner or carrier/employer to the employee and the division within five calendar days of release.
- E. The carrier/employer may request medical reports in addition to regular progress reports. A

charge may be made for such additional reports, which charge should accurately reflect the time and effort expended by the physician.

R612-2-4. Hospital or Surgery Pre-authorization.

Any ambulatory surgery or inpatient hospitalization other than a life or limb threatening admission, allegedly related to an industrial injury or occupational disease, shall require pre-authorization by the employer/ insurance carrier. Within two working days of telephone request for pre-authorization, the employer/carrier shall notify the physician and employee of approval or denial of the surgery or hospitalization, or that a medical examination or review is going to be obtained. The medical examination/review must be conducted without undue delay, which in most circumstances would have four days from receipt of the request to notify the physician and employee. If the employee chooses to be hospitalized and/or to have the surgery prior to such pre-authorization or medical examination/review, the employee may be personally responsible for the bills incurred and may not be reimbursed for the time lost unless a determination is made in his/her favor.

R612-2-5. Regulation of Medical Practitioner Fees.

A. The Labor Commission of Utah:

1. Establishes and regulates fees and other charges for medical provider services as required for the treatment of a work-related injury or illness.
2. Adopts and by this reference incorporates the National Centers for Medicare and Medicaid Services (CMS) for the Medicare Physician Fee Schedule (MPFS) Resource-Based Value System (RBRVS) 2007 Edition, as the method for calculating reimbursement and the American Medical Association's CPT, 2007 edition, coding guidelines. The non-facility total unit value will apply in calculating the reimbursement, except that procedures provided in a facility setting shall be reimbursed at the facility total unit value and the facility may bill a separate facility charge. The CPT-4 coding guidelines and RBRVS are subject to the Utah Labor Commission's Medical Fee Guidelines and Codes and the following Labor Commission conversion factors for medical care rendered for a work-related injury or illness, effective July 1, 2007:
(Conversion Rates below EFFECTIVE July 1, 2007, to be used with the RBRVS procedural Unit value as per specialty.)

Anesthesiology	\$41.00 (1 unit per 15 minutes of anesthesia)
Medicine, E & M	\$44.00
Evaluation and Management Codes 99201-99204 and 99211-99214	\$45
Restorative Services	\$44.00
With Code 97001 and 97003	at 1.5 RVU
With Code 97002 and 97004	at 1.0 RVU
Pathology and Laboratory	150% of Utah's published Medicare carrier
Radiology	\$53.00
Surgery	\$37.00
All codes (all 20000 and 60000) (49505 through 49525)	\$58.00

3. Adopts and incorporates by this reference the Utah Labor Commission's Medical Fee Guidelines and Codes, as of July 1, 2007. The Utah Medical Fee Guidelines and Codes can be obtained from the division for a fee sufficient to recover costs of development, printing and mailing or can be downloaded at the Labor Commission's Web site at www.laborcommission.utah.gov/indacc/indacc.htm.
4. Decides appropriate billing procedure codes when disputes arise between the medical practitioner and the employer or his insurance carrier. In no instance will the medical practitioner bill both the employer and the insurance carrier.

The fee schedule is not the ceiling for procedures. It is the first line of guidance. Providers

have three options for procedures not covered in the fee schedule.

1. Appeal to payer for authorization for a set number of treatments.
 2. Providers may present evidence to medical fee committee for incorporating procedure into fee schedule.
 3. May apply for hearing.
- B. Employees cannot be billed for treatment of their industrial injuries or occupational diseases.
- C. Discounting from the fees established by the Labor Commission is allowed only through specific contracts between a medical provider and a payor for treatment of industrial injured/ill patients.
- D. Restocking fee 15%. Rule R612-2-16 covers the restocking fee.
- E. Dental fees are not published. Rule R612-2-18 covers dental injuries.
- F. Ambulance fees are not published. Rule R612-2-19.

R612-2-6. Fees in Cases Requiring Unusual Treatment.

The RBRVS scheduled fees are maximum fees except that fees higher than scheduled may be authorized by the Commission when extraordinary difficulties encountered by the physician justify increased charges and are documented by written reports.

R612-2-7. Insurance Carrier's Privilege to Examine.

The employer or the employer's insurance carrier or a self-insured employer shall have the privilege of medical examination of an injured employee at any reasonable time. A copy of the medical examination report shall be made available to the Commission at any time upon request of the Commission.

R612-2-8. Who May Attend Industrial Patients.

- A. The employer has first choice of physicians; but if the employer fails or refuses to provide medical attention, the employee has the choice of physicians.
- B. An employee of an employer with an approved medical program may procure the services of any qualified practitioner for emergency treatment if a physician employed in the program is not available for any reason.

R612-2-9. Changes of Doctors and Hospitals.

- A. It shall be the responsibility of the insurance carrier or self-insured employer to notify each claimant of the change of doctor rules. Those rules are as follows:
1. If a company doctor, designated facility or PPO is named, the employee must first treat with that designated provider. The insurance carrier or self-insured employer shall be responsible for payment for the initial visit, less any health insurance copays and subject to any health insurance reimbursement, if the employee was directed to and treated by the employer's or insurance carrier's designated provider, and liability for the claim is denied and if the treating physician provided treatment in good faith and provided the insurance carrier or self-insured employer a report necessary to make a determination of liability. Diagnostic studies beyond plain X-rays would need prior approval unless the claimed industrial injury or occupational illness required emergency diagnosis and treatment.
 2. The employee may make one change of doctor without requesting the permission of the carrier, so long as the carrier is promptly notified of the change by the employee.
 - (a) Physician referrals for treatment or consultation shall not be considered a change of doctor.
 - (b) Changes from emergency room facilities to private physicians, unless the emergency room is named as the "company doctor," shall not be considered a change of doctor. However, once private physician care has begun, emergency room visits are prohibited except in cases of:
 - (i) Private physician referral, or
 - (ii) Threat to life.

3. Regardless of prior changes, a change of doctor shall be automatically approved if the treating physician fails or refuses to rate permanent partial impairment.
- B. Any changes beyond those listed above made without the permission of the carrier/self-insurer may be at the employee's own expense if:
 1. The employee has received notification of rules, or
 2. A denial of request is made.
 - C. An injured employee who knowingly continues care after denial of liability by the carrier may be individually responsible for payment. It should be the burden of the carrier to prove that the patient was aware of the denial.
 - D. It shall be the responsibility of the employee to make the proper filings with the division when changing locale and doctor. Those forms can be obtained from the division.
 - E. Except in special cases where simultaneous attendance by two or more medical care practitioners has been approved by the carrier/employer or the division, or specialized services are being provided the employee by another physician under the supervision and/or by the direct referral of the treating physician, the injured employee may be attended by only one practitioner and fees will not be paid to two practitioners for similar care during the same period.
 - F. The Commission has jurisdiction to decide liability for medical care allegedly related to an industrial accident.

R612-2-10. One Fee Only to be Paid in Global Fee Cases.

In a global fee case, which is transferred from one doctor to another doctor, one fee only will be paid, apportioned at the discretion of the Commission. Adequate remuneration shall also be paid to the medical practitioner who renders first aid treatment where the circumstances of the case require such treatment.

R612-2-11. Surgical Assistants' Fees.

Fees, in accordance with the Commission's adopted Resource-Based Relative Value Scale (RBRVS), in addition to the global fee for surgical services, will be paid surgical assistants only when specifically authorized by the employer or insurance carrier involved, or in hospitals where interns and residents are not available and the complexity of the surgery makes a surgical assistant necessary.

R612-2-12. Separate Bills.

Separate bills must be presented by each surgeon, assistant, anesthetist, consultant, hospital, special nurse, or other medical practitioner within 30 days of treatment on a HCFA 1500 billing form so that payment can be made to the medical practitioner who rendered the service. All bills must contain the federal ID number of the person submitting the bill.

R612-2-13. Interest for Medical Services.

- A. All hospital and medical bills must be paid promptly on an accepted liability claim. All bills which have been submitted properly on an accepted liability claim, are due and payable within 45 days of being billed unless the bill or a portion of the bill is in dispute. Any portion of the bill not in dispute is payable within 45 days of the billing.
- B. Per Section 34A-2-420, any award for medical treatment made by the Commission shall include interest at 8% per annum from the date of billing for the medical service.

R612-2-14. Hospital Fees Separate.

Fees covering hospital care shall be separate from those for professional services and shall not extend beyond the actual necessary hospital care. When it becomes evident that the patient needs no further hospital treatment, he/she must be discharged. All billings must be submitted on a UB92 form and be properly itemized and coded and shall include all appropriate documentation to support the billing. There shall not be a separate fee charged for the necessary documentation in billing for payment of hospital services. The documentation of hospital services shall include at a minimum the discharge summary. The insurance carrier may request further documentation if needed in order to determine liability for the bill.

R612-2-15. Charges for Ordinary Supplies, Materials, or Drugs.

Fees covering ordinary dressing materials or drugs used in treatment shall not be charged separately but shall be included in the amount allowed for office dressings or treatment.

R612-2-16. Charges for Special or Unusual Supplies, Materials, Or Drugs.

- A. Charges for special or unusual supplies, materials, or drugs not included as a normal and usual part of the service or procedure shall, upon receipt of an itemized and coded bill, be paid at cost plus 15% restocking fees.
- B. For purposes of part A above, the amount to be paid shall be calculated as follows:
 - 1. Applicable shipping charges shall be added to the purchase price of the product.
 - 2. The 15% restocking fee shall then be added to the amount determined in sub part 1.
 - 3. The amount of taxes paid on the purchase of the supplies, materials, or drugs shall then be added to the amount determined in sub part 2, which sum shall constitute the total amount to be paid.

R612-2-17. Fees for Unscheduled Procedures.

Fees for medical or surgical procedures not appearing in the Commission's adopted RBRVS current fee schedule are subject to the Commission's approval and should be submitted to the Commission when the physician and employer or insurance carrier do not agree on the value of the service. Such fees shall be in proportion as nearly as practicable to fees for similar services appearing in the RBRVS.

R612-2-18. Dental Injuries.

- A. This rule established procedures to obtain dental care for work-related dental injuries and sets fees for such dental care.
- B. Initial Treatment.
 - 1. If an employer maintains a medical staff or designates a company doctor, an injured worker seeking dental treatment for work-related injuries shall report to such medical staff or doctor and follow their instructions.
 - 2. If an employer does not maintain a medical staff or designate a company doctor, or if such staff or doctor are not available, an injured worker may consult a dentist to obtain immediate care dental for injuries caused by a work-related injury.
- C. Subsequent care by initial treatment provider.
 - 1. If additional treatment is necessary, the dentist who provided initial treatment may submit to the insurer a request for authorization to continue treatment. The transmission date of the request must be verifiable. The request itself must include a description of the injury, the additional treatment required, and the cost of the additional treatment. If the dentist proceeds with treatment without authorization, the dentist must accept 70% of UCR as payment in full and may not charge any additional sum to the injured worker.
 - 2. The insurer shall respond to the request for authorization within 10 working days of the request's transmission. The 10 day period can be extended only with written approval of the Industrial Accidents Division. If the insurer does not respond to the dentist's request for authorization within 10 working days, the insurer shall pay the cost of treatment as contained in the request for authorization.
 - 3. If the insurer approves the proposed treatment, the insurer shall send written authorization to the dentist and injured worker.
 - 4. On receipt of the insurer's written authorization, and if the dentist accepts the payment provisions therein, the dentist may proceed to provide the approved services. The dentist must accept the amount to be paid by the insurer as full payment for those services and may not bill the injured worker for any additional amount.
- D. Subsequent care by other providers.

1. If the dentist who provided initial treatment does not agree to the payment offered by the insurer, the insurer shall within 20 calendar days direct the injured worker to a dentist located within a reasonable travel distance who will accept the insurer's payment offer.
 2. If the insurer cannot locate another dentist to provide the necessary services, the insurer shall attempt to negotiate a satisfactory reimbursement with the dentist who provided initial treatment. The negotiated reimbursement may not include any balance billing to the claimant.
 3. If the insurer is successful in arranging treatment with another dentist, the insurer shall notify the injured worker.
 4. If, after having received notice that the insurer has arranged the services of another dentist, the injured worker chooses to obtain treatment from a different dentist, the insurer shall only be responsible for payment of 70% of UCR. Under the circumstances of this subsection (4), the treatment dentist may bill the injured worker for the difference between the dentist's charges and the amount paid by the insurer.
- E. Payment or treatment disputes that cannot be resolved by the parties may be submitted to the Labor Commission's Adjudication Division for decision, pursuant to the Adjudication Division's established forms and procedures.

R612-2-19. Ambulance Charges.

Ambulance charges must not exceed the rates adopted by the State Emergency Medical Service Commission for similar services.

R612-2-20. Travel Allowance and Per Diem.

- A. An employee who, based upon his/her physician's advice, requires hospital, medical, surgical, or consultant services for injuries arising out of and in the course of employment and who is authorized by the self-insurer, the carrier, or the Commission to obtain such services from a physician and/or hospital shall be entitled to:
1. Subsistence expenses of \$5 per day for breakfast, \$6 per day for lunch, \$10 per day for dinner, and actual lodging expenses as per the state of Utah's in-state travel policy provided:
 - (a) The employee travels to a community other than his/her own place of residence and the distance from said community and the employee's home prohibits return by 10:00 p.m., and
 - (b) the absence from home is necessary at the normal hour for the meal billed.
 2. Reasonable travel expenses regardless of distance that are consistent with the state of Utah's travel reimbursement rates, or actual reasonable costs of practical transportation modes above the state's travel reimbursement rates as may be required due to the nature of the disability.
- B. This rule applies to all travel to and from medical care with the following restrictions:
1. The carrier is not required to reimburse the injured employee more often than every three months, unless
 - (a) more than \$100 is involved, or
 - (b) the case is about to be closed.
 2. All travel must be by the most direct route and to the nearest location where adequate treatment is reasonably available.
 3. Travel may not be required between the hours of 10:00 p.m. and 6:00 a.m., unless approved by the Commission.
 4. Requests for travel reimbursement must be submitted to the carrier for payment within one year of the authorized medical care.

5. Travel allowance shall not include picking up prescriptions unless documentation is provided substantiating a claim that prescriptions cannot be obtained locally within the injured workers' community.
6. The Commission has jurisdiction to resolve all disputes.

R612-2-21. Notice to Health Care Providers.

Any notice from a carrier denying further liability must be mailed to the Commission and the patient on the same day as it is mailed to the health care provider. Where it can be shown, in fact, that a medical care provider and the injured employee have received a denial of further care by the insurance carrier or self-insured employer, further treatment may be performed at the expense of the employee. Any future ratification of the denial by the Commission will not be considered a retroactive denial but will serve to uphold the force and effect of the previous denial notice.

R612-2-22. Medical Records.

- A. Workers' compensation insurers, employers and the Utah Labor Commission need access to health information of individuals who are injured on the job or who have a work-related illness in order to process or adjudicate claims, or to coordinate care under Utah's workers' compensation system. Generally, this health information is obtained from health care providers who treat these individuals and who may be covered by federal HIPAA privacy rules.

The HIPAA Privacy Rule specifically recognizes the legitimate need of the workers' compensation system to have access to individuals' health information to the extent authorized by State law. See 45 CFR 164.512(1). The Privacy Rule also recognizes the importance of permitting disclosures required by other laws. See 45 CFR 164-512(a). Therefore, disclosures permitted by this rule for workers' compensation purposes or otherwise required by this rule do not conflict with and are not prohibited by the HIPAA Privacy Rule.

- B. A medical provider, without authorization from the injured workers, shall:
1. For purposes of substantiating a bill submitted for payment or filing required Labor Commission forms, such as the "Physician's Initial Report of Injury/Illness" or the "Restorative Services Authorization," disclose medical records necessary to substantiate the billing, including drug and alcohol testing, to:
 - a. An employer's workers' compensation insurance carrier or third party administrator;
 - b. A self-insured employer who administers its own workers' compensation claims;
 - c. The Uninsured Employers' Fund;
 - d. The Employers' Reinsurance Fund; or
 - e. The Labor Commission as required by Labor Commission rules.
 2. Disclose medical records pertaining to treatment of an injured worker who makes a claim for workers' compensation benefits, to another physician for specialized treatment, to a new treating physician chosen by the claimant, or for a consultation regarding the claimed work related injury or illness.
- C. 1. Except as limited in C (3), a medical provider, whose medical records are relevant to a workers' compensation claim shall, upon receipt of a Labor Commission medical records release form, or an authorization form that conforms to HIPAA requirements, disclose his/her medical records to:
- a. An employer's insurance carrier or third party administrator;
 - b. A self-insured employer who administers its own workers' compensation claims;
 - c. An agent of an entity listed in B (1) (a through e), which includes, but is not limited to a case manager or reviewing physician;
 - d. The Uninsured Employers Fund;
 - e. The Employers' Reinsurance Fund;

- f. The Labor Commission;
 - g. The injured worker;
 - h. An injured workers' personal representative;
 - i. An attorney representing any of the entities listed above in an industrial injury or occupational disease claim.
2. Medical records are relevant to a workers' compensation claim if:
 - a. The records were created after the reported date of the accident or onset of the illness for which workers' compensation benefits have been claimed; or
 - b. The records were created in the past ten years (15 years if permanent total disability is claimed) and:
 - I. there is a specific reason to suspect that the medical condition existed prior to the reported date of the claimed work related injury or illness, or
 - ii. the claim is being adjudicated by the Labor Commission.
 3. Medical records related to care provided by a psychiatrist, psychologist, obstetrician, or care related to the reproductive organs may not be disclosed by a medical provider unless a claim has been made for a mental condition, a condition related to the reproductive organs, or the claimant has signed a separate, specific release for these records.
- D. A medical provider who has treated an injured worker for a work related injury or illness, shall disclose information to an injured workers' employer as to when and what restrictions an injured worker may return to work.
 - E. Requests for medical records beyond what sections B, C, and D permit require a signed approval by the director, the medical director, a designated person(s) within the Industrial Accidents Division, or an administrative law judge if the claim is being adjudicated.
 - F. A party affected by the decision made by a person in section E may appeal that decision to the Adjudication Division of the Labor Commission.
 - G. Upon receipt and within the scope of this rule, an injured worker shall provide those entities or person listed in C (1) the names, address, and dates of medical treatment (if known) of the medical providers who have provided medical care within the past 10 years (15 years for Permanent Total Disability claim) except for those medical providers named in C (3). Labor Commission Form 307 "Medical Treatment Provider List" must be used for this purpose. Parties listed in this rule must provide each medical provider identified on Form 307 with a signed authorization for access to medical records. A copy of the signed authorization may be sent to the medical providers listed on Form 307.
 - H. An injured worker may contest, for good reason, a request for medical records created prior to the reported date of the accident or illness for which the injured worker has made a claim for benefits by filing a complaint with the Labor Commission. Good reasons is defined as the request has gone beyond the scope of this rule or sensitive medical information is contained in a particular medical record.
 - I.
 1. Any party obtaining medical records under authority of this rule may not disclose those medical records, without a valid authorization, except as required by law.
 2. An employer may only use medical records obtained under the authority of this rule to:
 - a. Pay or adjudicate workers' compensation claims if the employer is self-insured;
 - b. To assess and facilitate an injured workers' return to work;
 - c. As otherwise authorized by the injured worker.
 3. An employer obtaining medical records under authority of this rule must maintain the medical records separately from the employee's personnel file.
 - J. Any medical records obtained under the authority of this rule to make a determination regarding the acceptance of liability or for treatment of a condition related to a workers'

compensation claim shall only be used for workers' compensation purposes and shall not be released, without a signed release by the injured worker or his/her personal representative, to any other party. An employer shall make decisions related only to the workers' compensation claim based on any medical information received under this rule.

- K. When any medical provider provides copies of medical records, other than the records required when submitting a bill for payment or as required by the Labor Commission rules, the following charges are presumed reasonable:
 - 1. A search fee of \$15 payable in advance of the search;
 - 2. Copies at \$.50 per page, including copies of microfilm, payable after the records have been prepared and
 - 3. Actual costs of postage payable after the records have been prepared and sent. Actual cost of postage are deemed to be the cost of regular mail unless the requesting party has requested the delivery of the records by special mail or method.
 - 4. The Labor Commission will release its records per the above charges to parties/entities with a signed and notarized release from the injured worker unless the information is classified and controlled under the Government Records Access and Management Act (GRAMA).
- L. No fee shall be charged when the RBRVS or the Commission's Medical Fee Guidelines require specific documentation for a procedure or when medical providers are required to report by statute or rule.
- M. An injured worker or his/her personal representative may obtain one copy of each of the following records related to the industrial injury or occupational disease claim, at no cost, when the injured worker or his/her personal representative have signed a form by the Industrial Accidents Division to substantiate his/her illness claim;
 - 1. History and physical;
 - 2. Operative reports of surgery;
 - 3. Hospital discharge summary;
 - 4. Emergency room records;
 - 5. Radiological reports;
 - 6. Specialized test results; and
 - 7. Physician SOAP notes, progress notes, or specialized reports.
 - (a) Alternatively, a summary of the patients records may be made available to the injured worker or his/her personal representative at the discretion of the physician.

R612-2-23. Adjusting Relative Value Schedule (RVS) Codes.

- A. When adjusting any medical provider's bill that has billed per the Commission's RBRVS, the adjusting entity shall provide one or more of the following explanations as applies to the down coding when payment is made to the medical provider:
 - 1. Code 99202, 99203, 99204 or 99205 - the submitted documentation for a new patient did not meet the three key components lacking in the level of history for the code billed.
 - 2. Code 99202, 99203, 99204 or 99205 – the submitted documentation for a new patient did not meet the three key components lacking in the level of examination for the code billed.
 - 3. Code 99202, 99203, 99204 or 99205 – the submitted documentation for a new patient did not meet the three key components lacking in the level of medical decision making for the code billed.
 - 4. Code 99202, 99203, 99204 or 99205 – the submitted documentation for a new patient did not meet the three key components lacking in the level of history and exam for the code billed.

5. Code 99213, 99214 or 99215 – the submitted documentation for an established patient did not meet the two key components lacking in the level of history and exam that the code billed.
 6. Code 99213, 99214 or 99215 – the submitted documentation for an established patient did not meet the two key components lacking in the level of history and medical decision making for the code billed.
 7. Code 99213, 99214 or 99215 – the submitted documentation for the established patient did not meet the two key components lacking in the level of exam and medical decision making for the code billed
- B. The above explanations may be abbreviated, with a legend provided, to accommodate the space of computerized messages

R612-2-24. Review of Medical Payments.

- A. Health care providers and payors are primarily responsible to resolve disputes over fees for medical services between themselves. However, in some cases it is necessary to submit such disputes to the Division for Resolution. The Commission therefore establishes the following procedure for submission and review of fees for medical services.
1. The provider shall submit a bill for services rendered, with supporting documentations, to the payor within one year of date of service.
 2. The payor shall evaluate the bill according to the guidelines contained in the Commission’s Medical Fee Guidelines and RBRVS and shall pay the provider the appropriate fee within 45 days as required by Rule 612-2-13.
 3. If the provider believes that the payor has improperly computed the fee under the RBRVS, the provider or designee shall request the payor to re-evaluation the fee. The provider’s request for re-evaluation shall be in writing, shall describe the specific areas of disagreement, and shall include all appropriate documentation. The provider shall submit all requests for re-evaluation to the payor within one year of the date of the original payment.
 4. Within 30 days of receipt of the written request for re-evaluation, the payor shall either pay the additional fee due the provider or respond with a specific written explanation of the basis for its denial of additional fees. The payor shall maintain proof of transmittal of its response.
- B. If the provider continues to disagree with the payor’s determination of the appropriate fee, the provider shall submit the matter to the Division by filing with the Division a written explanation of the disagreement. The provider’s explanation shall include copies of:
1. The provider’s original bill and supporting documentation;
 2. The payor’s initial payment of that bill;
 3. The provider’s request for re-evaluation and supporting documentation; and
 4. The payor’s written explanation or its denial of additional fees.
- C. The Division will evaluate the dispute according to the requirements of the Medical Fee Guidelines and RBRVS and, if necessary, by consulting with the provider, payor, or medical specialists. Within 45 days from the date the Division receives the provider’s request, the Division will mail its determination to both parties.
- D. Any party aggrieved by the Division’s determination may file an application for hearing with the Division of Adjudication to obtain formal adjudication of the dispute.
- E. A payor seeking reimbursement from a provider for overpayment of a bill shall submit a written request to the provider detailing the circumstances of the payment requested within one year of submission of the bill.
1. Providers should make appropriate reimbursements, or respond in writing detailing the reasons why repayment will not be made, within 90 days or receipt of a written request from a payor.

2. If a dispute as to reimbursement occurs, an aggrieved party may request resolution of the dispute by the Labor Commission.

R612-2-25. Injured Worker’s Right to Privacy.

- A. No agent of the employer or the employer’s insurance carrier shall be present during an injured worker’s visit with a medical provider, unless agreed upon by the claimant.
- B. If an agent of the employer or the employer’s insurance carrier is excluded from the medical visit, the medical provider and the insured worker shall meet with the agent at the conclusion of the visit so as to communicate regarding medical care and return to work issues.

R612-2-26. Utilization Review Standards.

- A. As used in this subsection:
 1. “Payor” means a workers’ compensation insurance carrier, a self-insured employer, third-part administrator, uninsured employer or the Uninsured Employers’ Fund, which is responsible for payment of the workers’ compensation claim.
 2. “Health Care Provider” means a provider of medical services, including an individual provider, a health-service plan, a health care organization, or a preferred provider organization.
 3. “Request for Authorization” means any request by a physician for assurance that appropriate payment will be made for a course of proposed medical treatment, including surgery or hospitalization, or any diagnostic studies beyond plain X-rays.
 4. “Utilization Review” as authorized in Section 34A-2-111, is a process used to manage medical costs, improve patient care, and enhance decision-making. Utilization review includes, but is not limited to, the review of requests for authorization to treat, and the review of bills, for the purpose of determining whether the medical services provided were or would be necessary, to treat the effects of the injury/illness. Utilization review does not include bill review for the purpose of determining whether the medical services rendered were accurately billed. Nor does it include any system, program, or activity in connection with making decisions concerning whether a person has sustained an injury or illness that is compensable under Section 34A-2 or 34A-3.
 5. “Reasonable Attempt” is defined as at least two phone calls and a fax, or three phone calls within five business days from date of the payor’s receipt of the physician’s request for review.
- B. Any utilization review system shall establish an appeals process, which utilizes a physician(s) for a final decision by the insurer, should an initial review decision be contested. The payor may establish levels of review that meet the following criteria:
 1. Level I—Initial Request and Review. A payor may use medical or non-medical personnel to initially apply medically-based criteria to a request for authorization for payment of a specific treatment. The treating physician must send all the necessary documentation for the payor to make a decision regarding the treatment recommended. The payor must then notify the physician within five business days of the request for authorization of payment for the treatment, by a method that provides certification of transmission of the document, of either an acceptance or a denial of the request. **A denial for authorization of payment for a recommended treatment, utilizing the Commission’s Form 223, must be sent to the provider with the criteria used in making the determination to deny payment for the treatment.** A copy of the denial must also be mailed to the claimant. Level I—Request and Review does not include authorization requests for services billed from the Restorative section of the Resource-Based Relative Value Schedule (RBRVS). Requests for authorization for restorative services are governed by Rule R612-2-3(B).
 2. Level II—Review. **A physician, who has been denied authorization of payment for treatment, or has received no response within five business days from the request**

for authorization for payment at Level I review, may request a physician's review by sending the completed portion of the Commission form 223 to the payor. Such a request for review may be filed by any physician who has been denied authorization for payment for restorative services beyond the initial eight visits as authorized by Rule R612-2-3(B). The requesting physician must include the times and days that he/she is available to discuss the case with the reviewing physician, and must be reasonably available during normal business hours. The payor's physician representative must complete the review within five days of the treating physician's request for review. Before the insurer's physician representative may issue a denial of an authorization for payment to treat, a reasonable effort must have made to contact the requesting treating physician to discuss the differing aspects of the case. Failure by the payor to respond within five business days, by a method that provides certification of transmission, to a denial for authorization for payment for treatment, shall constitute an authorization for payment of the treatment. The payor's denial to pay for the recommended treatment must be issued on Commission's Form 223, and the denial must be accompanied by the criteria that was used in making the decision to deny authorization along with the name and specialty of the reviewing physician. The denial to authorize payment for treatment must then be sent to the physician, the claimant, and the Commission. The payor shall notify the Commission if an additional five days is needed in order to contact the treating physician or to review the case. An additional extension of time may be requested from the Commission to accommodate highly unusual circumstances or particularly difficult cases.

- C. Upon receipt of denial of authorization for payment for medical treatment at Level II, the Commission will facilitate, upon the request of the claimant, the final disposition of the case. If the parties agree, the medical dispute may be resolved by the Commission through binding mediation or medical review. If there is not agreement among the parties, the Commission will resolve the dispute through formal adjudication. The payor shall be responsible for sending the claimant the Commission appeals information when the denial for authorization for payment for medical treatment is sent to the claimant.
- D. If the medical treatment requested is not an emergency, and treatment is rendered by the physician after receiving notice of the utilization standards encompassed in this rule, the following shall apply.
1. The Commission shall, if the disputed medical treatment is ultimately determined to be compensable as an expense necessary to treat the industrial injury or occupational disease, order that the physician be reimbursed at only 75% of the amount otherwise payable had appropriate authorization been timely obtained. The injured worker shall not be liable for any additional payment to the physician above the 75%.
 2. Neither the worker's employer or its workers' compensation insurer shall be liable for any portion of the cost of disputed medical treatment, if that treatment is ultimately determined not to be compensable as an expense necessary to treat an industrial injury or occupational disease.
 3. A worker may become liable for the cost of the disputed medical treatment, if that treatment is ultimately determined not to be compensable as an expense necessary to treat the industrial injury or occupational disease.
 4. Except for any co-pays or deductibles under the worker's health insurance plan, the penalty provision in D (1) and D (3) shall not apply if the physician performs the medical treatment in question, having been preauthorized in writing to do the same by a health insurer or other non-worker's compensation insurance payor.
 5. The penalty provisions in D (1) shall not apply to medical treatment rendered in emergency situations, which are defined as a threat to life or limb.

6. The Commission shall notify a physician, in writing, of reported violations of this rule. Repeated violations of this rule by a physician may result in a report from the Commission to the Department of Commerce, Division of Occupational/Professional Licensing.
